PROJECTS

1.Tourist place management system—The Travel

Management System has been advanced by opting the Online Booking and information system. The Travel search and Booking Software is an automated system that has been developed for the tour travelers, tour operators and the tourism agents. The website allows one to log on and perform the real time and online reservations. The website has lot of information too for the convenience of the tourist which shows the various cities and places along with the complete details and images of the tourist places. The details also include the distance of the tourist place from major cities and the how to reach and reservations. The transportation and accommodation is also available in this online service. The administration has to manage the travels details, users and agents and its updation.
