PROFESSIONAL SUMMARY

Motivated GIS professional with over 1.8 years of experience as a GIS Analyst, Skilled in spatial data analysis, digitization, and web GIS development. Proficient in GIS tools like **QGIS & ArcGIS**, and also in **Python, JavaScript, HTML & CSS** with a strong foundation in **ArcGIS JavaScript API for web-based GIS applications**. Seeking to transition into a GIS Developer role to leverage programming skills in GIS solutions.

PROFESSIONAL EXPERIENCE

GIS ANALYST (1 year 8 months)

Deduce Technologies, Bangalore, October 2023 – Present

- Collected and processed spatial data using QGIS and ArcMap. Digitized shop locations from street images and added POIs with attributes.
 - Used JOSM to digitize buildings, added floor information as centroids, and categorized using satellite view.
 - Digitized European buildings, parks, and industries using QGIS based on specific area constraints. Mapped Indian natural features including forests, waterfalls, and sanctuaries using satellite imagery.
 - Conducted spatial analysis and contributed to improved data visualization workflows.
-

TECHNICAL SKILLS

GIS Software: ArcMap, QGIS, JOSM, ArcGIS Pro & ArcGIS Online

Programming Languages: PYTHON & JAVA SCRIPT (ArcGIS JS API)

Web Technologies: HTML & CSS,

Geospatial Analysis: Remote Sensing, Spatial Data Analysis

Data Management: Map Creation, Data Processing

EDUCATION

 **Master of Science in Applied Geology**

Anna University, Chennai, 2021-2023

 **Bachelor of Science in Geology**

National College, Tiruchirappalli, 2018-2021

PROJECTS

INTERNSHIP PROJECT

Project name: Assessment of Groundwater Potential and Recharge Zones Using Remote Sensing and GIS Techniques

Description: To locate the potential zone and recharging area in the Kovalam basin, Tamil Nadu.

Tool Used: ArcGIS

ACADEMIC PROJECT

Project name: Assessment of water quality and identifying the geochemical process in Noyyal river, Tamilnadu.

Description: Evaluate the water quality for drinking and irrigation purpose.

Tool Used: ArcGIS

Web GIS Development Projects (ArcGIS JS API)

During GIS Developer Training Program

1. Weather Condition Mapping Tool

- Built an interactive web map visualizing real-time weather conditions using ArcGIS JS API. Integrated dynamic layers and visual effects to represent temperature, rainfall, and wind data effectively.

2. Custom Legend & UI Enhancements

- Designed and implemented custom legend widgets to control map symbology visibility.

3. Interactive Editing with Editor Widget

- Integrated Editor Widget to enable users to add, update, or delete spatial features directly on the map.

4. Advanced Query Operations

- Implemented attribute-based and statistical queries to analyze geospatial data and summarize insights.

5. Large Dataset Handling

- Developed optimized workflows to query and render large feature layers using pagination and definition expressions.

6. Dynamic Graphics Filtering

- Created visual filters using graphics layers that respond to user input, enhancing data exploration capabilities.

7. Thematic Mapping with Unique Value Renderer

- Applied unique value renderers to symbolize features based on attributes such as land use type, weather category, etc.

CERTIFICATIONS AND TRAINING

Building GIS Web Applications – Hexamap Solutions (March 21, 2025)

GIS Basics, Going Places with Spatial Analysis, ArcGIS Pro Basics – Esri

Python Course – GUVI, IITM Research Park

Front-End Development (HTML, CSS, JavaScript) – Great Learning Academy

Internship in Hydrology & Quality Control – Institute for Water Studies, Chennai

PERSONAL DETAILS

Address	22, main road police station opposite pauparapatti, Dharmapuri(dt), Tamilnadu 636809.
Date Of Birth	18 January 2001
Gender	Female
Languages known	English & Tamil
Notice period	Immediately
Relocate	Chennai

DECLARATION

I hereby declare that all the above information is true to the best my knowledge and belief.

Thanking you

Place: Dharmapuri

Yours sincerely

Date:

(DIVYA BHARATHI S)
