Objective: Experienced GIS professional with over 4 years of expertise in managing GIS projects, spatial analysis, and utility network optimization using ESRI's ArcGIS platform. Seeking to leverage my skills in data-driven decision-making, utility infrastructure management, and project leadership to contribute to transformational GIS initiatives. Dedicated to delivering innovative solutions that optimize operations and support business objectives in the utilities sector.

Skills:

- GIS Project Management: Led and delivered complex GIS projects, managing resources, timelines, and budgets.
 - ESRI ArcGIS Expertise: Extensive experience with ArcGIS Pro and ArcMap for spatial analysis, mapping, and geodatabase management.
 - Utility Network Modeling: Proficient in modeling network connectivity and asset management for utilities.
 - Spatial Analysis & Mapping: Conducted detailed spatial analysis and generated thematic maps for decision-making.
 - Client Engagement: Collaborated with clients to provide customized GIS solutions and consulting services.
 - Data Governance & QA: Ensured data quality and accuracy through rigorous QA/QC processes.
 - Change Management: Supported GIS transformation projects, migrating legacy systems to advanced platforms.
-

Professional Experience:

Power System GIS Analyst

Continuum Associates, LLC, New Jersey

Feb 2023 - July 2024

- Led GIS projects focused on utility infrastructure and renewable energy, including the optimization of transmission line routes for offshore wind farms.
- Conducted extensive spatial analysis and mapping using ArcGIS Pro and QGIS, delivering high-accuracy maps and geospatial reports to inform decision-making for utilities.
- Worked closely with stakeholders to identify client requirements, providing customized geospatial solutions for infrastructure planning and asset management.
- Managed large geospatial datasets, ensuring data integrity through rigorous QA/QC processes, including data acquisition, integration, and conversion tasks.

- Collaborated with cross-functional teams to deliver transformation projects that improved operational efficiency, reduced costs, and enhanced data governance for utility networks.

QA Test Analyst

Tech Mahindra

Apr 2019 - Feb 2023

- With the knowledge of ISTQB Certifications managed software testing activities, orchestration, estimation, scheduling, and allocation of work activities to Offshore and Onsite agencies, as defined by Requisite Designations and Business Rules.
- Performed quality control checks on GIS software, validating spatial data, maps, and reports before deployment, ensuring adherence to high data standards.
- Contributed to the quality assurance of GIS applications, focusing on utility networks and infrastructure management.
- Demonstrated proficiency in manual testing methodologies, including functional testing, regression testing, and sanity testing, within Agile environments (SCRUM, KANBAN).

Business Analyst

Lumina Datamatics

Jun 2018 - Mar 2019

- Conducted pricing and product mapping analysis for leading enterprise, optimizing client strategies.
- Contributed to data analysis projects, providing insights for competitive product pricing.

Education:

Bachelor of Technology in Electronics and Communication Engineering

Pondicherry University, Puducherry

Jul 2014 - May 2018

Projects:

Offshore Wind Farm Mapping

- Led mapping and GIS analysis for Blue Float and Corio Central Atlantic OSW projects.
- Developed interactive dashboards and heatmaps to visualize project data and constraints.

Software Skills:

- Geographic Information Systems (GIS): ArcGIS, QGIS, LiDAR, Visio, Map Creation, and Analysis
- Data Analysis: Spatial Analysis, Heatmaps, Transit Analysis, Live Dashboards, Urban Planning, Substation & Transmission Line Mapping
- Programming: Python (Automation Scripts), Batch Processing, Workflow Enhancements
- Visualization Tools: Tableau, Power BI, Google Earth Pro, TARA
