

GILBERT JOHNSON

LinkedIn | Leetcode | HackerRank | GFG | (+91) 90473 86439 | johnson220898@gmail.com | Chennai, TN, India - 600089

Passionate engineer and developer dedicated to continuous learning and applying modern technologies to deliver innovative solutions. Skilled in designing and implementing efficient plans, collaborating with teams, and driving organisational success. Goal-oriented and committed to contributing to cutting-edge software development projects.

SKILLS

- **Web & Dev:** HTML5, CSS3, ReactJS, ExpressJS, NodeJS, PostgreSQL, MySQL, MongoDB, GeoServer, Android, Nginx, Google Cloud Platform.
- **Geospatial:** ArcGIS Pro, QGIS, GEE JS API, GEE Python API, GDAL, ArcGIS JS API, ArcGIS runtime, ArcSDE.
- **Data Science:** Pytorch, Keras, Numpy, Matplotlib, Scikit-learn, Pandas
- **Automation & Productivity:** Docker, Apache Airflow, JSON, YAML, Git, MS Office, GSuite, Agile, Pair Programming.
- **Programming Languages:** C++, Go, Java, JavaScript, Python.
- **Prompting:** ChatGPT, Claude, Copilot, Gemini.

EXPERIENCE

Engineer - GIS | ESRI India Technologies Private Limited | Noida, Uttar Pradesh, India | Sep 2023 – Apr 2024

- Designed and Developed GIS based (Geofencing, Vehicle tracking) web and android solutions for government projects.
- Optimised design pattern for android application for improved user experience and improved efficiency by 70%.
- GIS tech stack and architecture maintenance and build visualisation and report generating modules.

Intern - GIS | Mahindra Consulting Engineers Limited | Chennai, Tamil Nadu, India | Oct 2022 - Nov 2022

- Site Suitability Analysis for a new Industrial park
- Prepared and analysed the feasibility map of the new industrial park in northern Ghana for informed decision making.

PROJECTS

Spatio-Temporal Analysis of Southwest monsoon for early drought advisory service | Django, Keras, GEE

- Designed and Developed advisory system for drought in Tamil Nadu using deep learning backed by Django
- System for visualising spatial pattern of temperature, rainfall, soil moisture, NDVI, evapotranspiration.

Estimation System of Optical and Non optical water quality parameters such as Chl-a, TDS, EC

- Implemented a proven and published study of estimating water quality parameters using Django, HTML, CSS
- Leveraged the cloud computing capabilities of GEE to retrieve Landsat 8 TOA data and used Machine Learning to predict chl-a, TDS, EC.

EDUCATION

Master of Engineering - Remote Sensing and Geomatics | College of Engineering | 2022 - 2023 | CGPA - 8.2 / 10

Bachelor of Engineering - Civil | St.Joseph's Institute of Technology | 2016 - 2020 | CGPA - 7.4 / 10

CERTIFICATION AND ACHIEVEMENTS

Git and Github Essentials | Go(Basic) | Javascript(Basic & Foundation) | SQL(Basic) | Google AI Essentials | Geospatial Analysis with ArcGIS | BEC - Vantage - C | Data Engineering - Astronomer | Others
