SKILLS

B.E. Computer Science & Engineering

- **CGPA:** 7.10 (until 6th semester)
- **Intrested subjects:** Object oriented programming , Database management system , Data structures and algorithm , Internet programming.

Marks(%)

HSC :

Skills: Excel, Statistics, Python, SQL, Machine learning, Web Scraping, API Development, Database Design, GraphQL .

Frameworks: Numpy, Pandas, Matplotlib, Seaborn, Scikit-learn, Tensorflow, Beautiful Soup, Flask, FastAPI, SQLAlchemy.

Tools: Version Control (Git & GitHub), VS code, Jupyter Notebook, PowerBI, Pycharm

EDUCATION

Sengunthar Engineering College(Autonomous),
Tiruchengode,
Tamilnadu.

Expected Graduation,
2025

Jawahar hr.sec.school, Neyveli, Cuddalore- 2021

79%

SSLC :

Jawahar hr.sec.school , Neyveli, Cuddalore – 2019

71%

PROJECTS

Exploratory Data Analysis On Airbnb Booking

Python | Jupyter Notebook | Numpy | Pandas

- Conducted Exploratory Data Analysis on Airbnb booking data, uncovering trends and patterns in guest behavior, pricing, and location preferences.
- Python libraries like Pandas, Matplotlib, and Seaborn were used to visualize insights.

Forest Fire Prediction Website

Python | Jupyter Notebook | Numpy | Pandas | Scikit-learn | Flask

- Created a Forest Fire Prediction website with Flask, utilizing Python, Numpy, Pandas, and Scikit-learn for machine learning,
- I unraveled key factors that influence Forest Fire risk to a data-driven approach for Forest Fire prevention.

College Dues off

Python | FastAPI | SQLAlchemy | JWT | Pydantic | PostgreSQL | SlowAPI

- Developed **College Dues Off**, a digital solution for streamlining college due clearance, featuring a React Native frontend and a FastAPI backend with JWT-based authentication as a group of three.
- Implemented PostgreSQL with SQLAlchemy for efficient data management and Pydantic for schema validation.

Handwritten digit recognition

Python | Jupyter Notebook | Tensorflow | Convolutional Neural Network | OpenCV2

- Developed a deep learning model using Convolutional Neural Networks (CNN) and TensorFlow to accurately recognize and convert handwritten text into digital format.
- Implemented image preprocessing using OpenCV2 to enhance recognition accuracy and created a robust system capable of interpreting various handwriting styles and characters.

CERTIFICATION

Udemy

Statistics and Hypothesis Testing For Data Science

NPTEL

Deep Learning

NPTEL

Data Analytics with Python

Coursera

Machine Learning with Python

Udemy

Web Scraping with Beautiful Soup
