OBJECTIVE

To start my career as a Software Developer and grow professionally by applying my coding skills and enthusiasm for software development while making a positive impact on projects and teams.

EDUCATION

M.C.A from Bharathidasan University at Bishop Heber College with 7.54 CGPA.	2024
B.C.A from Bharathidasan University at Bon Secours College with 9.24 CGPA.	2022
HSC from St.Joseph Matriculation Higher Secondary School with 66.5%.	2019
SSLC from St.Joseph Girls Higher Secondary School with 92%.	2017

SKILLS

TECHNICAL SKILLS

- **Java Programming:** Mastery in Java programming language, including knowledge of core concepts of variables, data types, loops, Inheritance and Interfaces in java.
- **Kotlin Programming:** Having knowledge in Kotlin basic syntax, variables and functions.
- **C Programming:** Proficient knowledge in C programming like variables, syntax, data types and control flow statements.
- **Backend Development:** Comprehensive knowledge in RDBMS databases like MYSQL.

SOFT SKILLS

- **Communication:** Clear and effective communication is crucial for conveying ideas, discussing requirements, and collaborating with team members and stakeholders.
- **Problem-Solving:** Proficient in problem-solving and troubleshooting, adept at analyzing complex issues, identifying root causes, and implementing effective solutions to ensure seamless functionality and optimal performance in diverse technical environments.
- **Teamwork:** Proven ability to collaborate seamlessly with multidisciplinary teams to achieve project objectives and deliver high-quality results within tight deadlines.

PROJECTS

Android Application: Developed a responsive android application using android and MYSQL, allowing farmers to sell their products directly to the user without the need of retailers, fostering a more transparent, efficient, and sustainable agricultural ecosystem.

Environment: Android Eclipse, MYSQL.

WORKSHOP

- **AI Tools Mastery:**

Successfully completed a workshop conducted by Be10x, focused on harnessing the power of AI tools such as ChatGPT and DALL-E2 for enhanced productivity in both personal and professional endeavors.

Acquired practical skills under the guidance of Be10x in utilizing AI-driven tools, resulting in daily time savings of up to 2 hours and significantly improving overall efficiency.

LEADERSHIP

- **Event Organizer, National Technical Symposium:** Hosted and organized a prestigious national-level technical symposium at Bishop Heber College in 2024.
- **Secretary:** During my bachelor's I served as the discipline secretary for our department throughout the 2021-2022 academic year.
