PROJECTS

Theshortlistd - Raos Infosoft Join Pvt Ltd

Feb 2024 - Present

- This is an online platform that connects employers with jobseekers. Companies can post job listings, and individuals can search and apply for relevant positions.

SKILLS

- **User Research:** Utilizing a blend of qualitative and quantitative methods, I delved into user behaviors, preferences, and pain points, ensuring our designs were rooted in user insights.
- **Design Thinking:** Adopting a human-centric approach, I employed design thinking methodologies to ideate creative solutions that resonated with users and addressed their underlying needs.
- **Design Thinking:** Adopting a human-centric approach, I employed design thinking methodologies to ideate creative solutions that resonated with users and addressed their underlying needs.
- **Prototyping:** Iteratively prototyping and testing designs, I translated ideas into tangible experiences, gathering valuable feedback to refine and optimize the user journey effectively.

Huddle Now - Click flow IT Services

Aug 2023 - Jan2024

- "Huddle Now Web App syncs seamlessly with Zoom, Teams, and Google Meet, enhancing productivity in meetings. Its intuitive interface streamlines collaboration, allowing teams to focus on the agenda. With real-time updates and easy integration, Huddle Now ensures efficient communication across platforms. Elevate your meetings with Huddle Now, the ultimate productivity companion."

SKILLS

- **User Research:** Utilizing a blend of qualitative and quantitative methods, I delved into user behaviors, preferences, and pain points, ensuring our designs were rooted in user insights.
- **Color Theory:** Leveraging the psychology of color, I curated harmonious color palettes that evoked desired emotions and enhanced usability, ensuring a visually engaging and cohesive user experience.
- **Information Architecture:** Structuring information with clarity and coherence, I orchestrated intuitive information architectures that empowered users to navigate effortlessly and find what they need with ease.
- **Wireframing and Prototyping:** Proficiency in creating wireframes and prototypes using tools like Sketch, Adobe XD, Figma, or InVision to visualize and iterate on design concepts.
