EDUCATION

Jaypee Institute Of Information Technology, Noida

2024-2028

Bachelor of Technology in Computer Science

Yaduvanshi Shiksha Niketan, Sector 33, Gurugram

2022-2024

XII, CBSE | 95% (PCME)

EXPERIENCE

Edaco Cloud LLP — Microsoft Azure AI Trainee Intern

June 2025 – July 2025

- Worked on **Microsoft Azure AI Services**, focusing on **cloud-based** AI solutions and **chatbot** development.
- Built and deployed an **Azure AI chatbot**, implementing conversational workflows and API integrations in Node.js, integrated it with websites, Slack, Telegram, Amazon Alexa etc.
- Gained hands-on experience in **AI pipelines**, cloud deployment, and service orchestration.
- Demonstrated strong **problem-solving ability**, adaptability, and technical ownership during the internship.

PROJECTS

Greenora – Geospatial Environmental Risk Mapping Dashboard | *QGIS, React, Leaflet, Remote Sensing* | [GitHub](#)

- Developed a **geospatial dashboard** using **Landsat 8 data**, computing **NDVI (Band 4 & 5)** and **thermal heat (Band 10)** to identify environmentally stressed urban areas.
- Designed a composite **environmental risk** index by integrating vegetation and temperature layers, revealing urban heat island patterns in dense regions.
- Built an interactive **React + Leaflet** interface with advanced **GIS visualization (raster styling, layer blending)**, enabling scalable analysis across multiple cities.

AI Email Organizer Extension | *JavaScript, Chrome Extensions API, Python, FastAPI* | [GitHub](#)

- Built a **full-stack Chrome extension** to classify Gmail messages into actionable categories, using an **AI-based** system (**Needs Reply, Important, Ignore**) to improve productivity.
- Implemented a **privacy-first architecture** with explicit user consent and **local data storage**, ensuring secure and controlled data access.
- Achieved **<1 second processing** for 50+ emails by integrating an optimized **FastAPI backend** with a Chrome Extension frontend for real-time classification.

SkillSync (In Progress) | *React, Node.js, Express, PostgreSQL* | [GitHub](#)

- Developing a **developer collaboration platform** for skill-based networking and team formation, enabling users to connect based on shared expertise.
- Implemented authentication (**JWT + Google OAuth**) and user profile management, along with a skill endorsement system for credibility-based ranking.
- Designed a collaborator **discovery engine** using skill matching and **scoring algorithms**, with planned features including **real-time chat** and project collaboration.

ACHIEVEMENTS

- Completed **Microsoft Azure AI Internship** at **Edaco Cloud LLP**.
- Developed multiple **full-stack + AI-integrated** applications.
- Strong foundation in **Data Structures, Web Development, and Cloud Computing**.

TECHNICAL SKILLS

- Languages:** C++, C, Python, JavaScript
- Frontend:** React, HTML, CSS, Leaflet
- Backend:** Node.js, Express, FastAPI
- Databases:** PostgreSQL, MongoDB
- Tools & Platforms:** QGIS, Microsoft Azure, Git, GitHub
- Concepts:** Data Structures & Algorithms, OOP, REST APIs, GIS, Remote Sensing, AI Integration
