SUMMARY

Geoinformatics professional with expertise in gis software, web gis development, programming, and data analysis. Experienced in leveraging geospatial tools for spatial analysis and decision support. Passionate about contributing to innovative projects that drive sustainable solutions through advanced geospatial technologies.

EDUCATION

Master Of Science in Geoinformatics

Karnataka State Rural Development and Panchayat Raj University – Gadag, Karnataka.

2022 - 2024

Bachelor Of Science in Geography

V.V College of Science and Technology – Palakkad, Kerala (Calicut University)

2019 – 2022

EXPERIENCE

PROJECT

Kerala State Remote Sensing and Environmental Centre(KSREC), Thiruvananthapuram

May 2024 – September 2024

- Project Title: Impact of LULC Change and LST Change on Air Quality Using Sentinel-5P Data and Visualization on WebGIS
- Role: Developed an interactive web portal using HTML, CSS, JavaScript, and Leaflet to visualize spatial impacts of Land Use/Land Cover (LULC), Land Surface Temperature (LST), and air quality changes, aiding in sustainable urban planning in Ernakulam.

Internship

ICAR-National Bureau of Soil Survey and Land Use Planning-Regional Centre,Bengaluru

November 2023 – December 2023

- Project Title: Spatial Prediction of Soil Reaction and Organic Carbon Using Digital Soil Mapping Approach
- Role: Created digital maps for soil organic carbon and pH using Quantile Regression Forest (QRF) modeling. Integrated terrain parameters, satellite imagery (Landsat-9), soil moisture index, LST, and climate data to predict soil patterns and reduce uncertainty with high-resolution DEMs.

Rural Immersion Program

Kurtakoti Village, Gadag District

- Conducted GIS-based analysis to create maps for land use/land cover, watershed, contour, and village assets.

Technical Skills

GIS and Remote Sensing Tools

- ArcGIS
- QUANTUM GIS
- ERDAS imagine
- Saga GIS
- Geo Server
- Google Earth Engine
- Google Earth Pro

Programming and Data Analysis

- R and R studio
- Python (Django)
- Data Analysis
- Data visualization

Web Development

- Web Designing (HTML, CSS, JavaScript)
- Django
- Visual Studio Code

CERTIFICATE

- Impact of lulc change and Ist change on air quality using sentinel-5p data and visualization on WebGIS
- Spatial prediction of soil Reaction and organic Carbon using Digital soil mapping approach: A case study from Chamarajanagar District Karnataka
- Web Designing and Web Development (Django)
- Geospatial Technology for Climate Smart Agriculture
- Advances in Geospatial Techniques for Monitoring and Modelling Hydro meteorological Disasters
- Basics of Remote Sensing, Geographical Information System and Global Navigation Satellite System
