SUMMARY

Dedicated post-graduate geologist with extensive expertise in earth sciences, seeking opportunities to contribute to environmental causes and green projects. Possesses a strong foundation in geological principles and a passion for sustainability. Proven ability to apply academic knowledge to real-world scenarios, with a focus on preserving and enhancing the environment. Eager to leverage skills and enthusiasm for ecological initiatives that promote environmental well-being.

EDUCATION

Master of Science in Applied Geology - 2021-2023

Bangalore University

WORK EXPERIENCE

Intern (Sep 2023- Nov 2023)

ESSEN & COMPANY- Intern

Utilized remote sensing and GIS techniques to analyze underground water resources, including data collection, processing, and interpretation. Conducted field surveys to gather ground-truth data and validate remote sensing findings. Created spatial models and maps to visualize and assess groundwater distribution and variability. Collaborated with interdisciplinary teams to integrate remote sensing data with hydrological models for groundwater management initiatives.

FIELD EXPERIENCE

- HUTTI GOLD MINE COMPANY LIMITED
- IRON AND MANGANESE MINE IN SANDUR
- DONIMALAI IRON MINE IN SANDUR
- CHITRADURGA Schist belt

DISSERTATION

- Project on GROUNDWATER QUALITY STUDIES IN AND AROUND BIDADI NELLIGUDDE TANK USING REMOTE SENSING AND GIS TECHNIQUES"
- Conducted comprehensive field investigations, focusing on geological formations and structures. Collected water samples from various locations within the study area for detailed study. The research aims to comprehend the impact of geomorphology, geology and groundwater maps using ARC-GIS

SKILLS

- Mastery in ArcGIS, ArcMap, QGIS, ENVI
- Environmental geology
- Google Earth Engine (Intermediate)
- Geographic Information Systems (GIS)
- Geospatial Analysis
- Technical reporting
- Data Interpretation
- Structural Geology
- Field Sampling/Sample Testing
- Site Surveying
- Analytical Skills

CERTIFICATIONS

- Project on GROUNDWATER QUALITY STUDIES IN AND AROUND BIDADI NELLIGUDDE TANK USING REMOTE SENSING AND GIS TECHNIQUES"
