

OBJECTIVE

Looking for an opportunity with 2 years of experience in the GIS field. My key skills include GIS analysis and GIS software development using GIS and geospatial technology. The tools and technologies that I am proficient with are Arc GIS, QGIS, OpenLayers, Leaflet, Geoserver, PostgreSQL, PostGIS.

PROFESSIONAL EXPERIENCE

Server Administrator (GIS)

Sep 2022 - Present

National Health Mission, Chennai

- Geo Spatial analysis of health dataset.
- Maintenance of spatial Data sets.
- Developed Geospatial content management website for viewing the spatial layers.
- Testing of the application.

GIS Expert

Dec 2020 - Aug 2022

National Health Mission, Chennai

- Geocoding of health facility and street dataset.
- Disease Mapping (Clustering, Hot spot, Incidence and spread).
- Preparing standard map for health facilities
- Developed Web map application with Health facilitates and WMS layers.
- Creation and maintenance of layers in Geoserver.

GIS Engineer

Sep 2020 - Nov 2020

Darashaw Pvt. Ltd

- Preparation of Base Layer for Property and Utility Mapping.
- Integration of MIS with GIS data and to be involved in pre finalization of data.

EDUCATION

M.E - Remote Sensing and Geomatics

2018 - 2020

College of Engineering, Guindy

CGPA - 8.13

B.E - Civil Engineering

2012 - 2016

VEL Tech

CGPA - 8.43

CERTIFICATIONS

- Web GIS Development, Udemy, 2021
- Python Programming, Lets upgrade, 2020
- Master Diploma in Building Design (AutoCAD, Revit, STAAD.Pro), CADD Centre, 2015

KEY SKILLS

- | | | |
|-------------|------------------------|--------|
| • Arc GIS | • AutoCAD | • Java |
| • QGIS | • Python | • HTML |
| • GeoServer | • Openlayers & Leaflet | • CSS |

ACADEMIC PROJECT

- **Assessing the vulnerability of aquifer on seawater intrusion using Geo spatial Technique.**
 - The vulnerability map for seawater intrusion has been created based on GIS overlaying technique.
 - Sensitivity analysis is done to determine the parameter which influence the most.
 - Simulation for seawater intrusion is done using MODFLOW and MT3DMS software.
- **Planning, designing and analysis of luxury hotel building**
 - This includes the entire planning of a hotel building with all facilities.
 - The grid beam is designed in order to reduce the number of columns in the structure.
 - The software like Auto CAD, STAAD Pro are been used.

DECLARATION

I hereby declare that the details furnished above are true to the best of my knowledge.

Place : Chennai
