EXPERIENCE

Magikminds software services Pvt Ltd, Hyderabad — Software Engineer

FEB 2020 - PRESENT

Having 4 years of experience in Smallworld Technology. Having an exposure to VMDS database creation, Developing custom application, customizing OOB application, Data migration, Upgrade and Database compression activities.

EDUCATION

Aditya Engineering College, Surampalem — B.Tech(E.C.E)

July 2016 - September 2020

Secured 8.01 CGPA in Bachelor of Technology

Geetam Junior College, Rajahmundry — Intermediate(M.P.C)

June 2014 - March 2016

Secured 96 percent in board of Intermediate

Sri Vijetha High School, Tallapudi — SSC

June 2013 - April 2014

Secured 9.2 GPA in ssc board.

PROJECTS

GE Defect fixing- UK

GE Smallworld provides network software solutions. The Company's line of business includes designing, developing, and producing prepackaged computer software. This project is to fix the defects raised in existence versions and to release the bug free application in latest version

As a Developer:

1. Analyze and reproduce the the defect reported
2. Resolve the defect with a test driven solution.
3. Automation tests(Munits) for the agreed solution approach.

TECHNICAL SKILLS

Languages : Magik
Database: VMDS, MySQL.
Technology Areas: EO, PNI, GDO, Smallworld CST, Design Manager, FME, Munits and basics of PRA..

OS

Windows, basics of Linux.

AWARDS

Shining star- 2021

Best project of the year,
Bharati Telemedia, Nokia OSS
GIS Transformation – 2022.

Best team of the year, AG&P
and Think Gas - 2022

4. Manual testing of the defect.

Torrent Power, Support –Ahmedabad

Torrent Power is one of the leading brands in the Indian power sector. With an all-round experience in generation, transmission and distribution of power, and a proven track record of implementing large power projects, the Company is the most experienced private sector player in Gujarat.

As a Developer:

1. Meetings with Customer and other business team
2. Optimizing the existing applications
3. Resolving the issues in customWeb and Desktop applications
4. Support for EO 4.3 application.
5. Database compression.

Meralco, SIN Length changes – Philippines

Meralco is an Electric Power Distribution company in the Philippines. The scope of engagement is to replace the existing CMS data loading process with a new CIS data loading process.

As a Developer:

1. Developing the scripts for EO and ACE data model changes.
2. Migrated data using FME
3. Developed GSS services for EAM-SQL Interface to update new fields data in SQL from EAM
4. Meter auto update job to update new fields in EGIS
5. Testing end to end CIS/CMS enhancements
6. Involved in design documentation.
7. Testing and fixing the issues.

Airtel OSS Transformation –Delhi

Airtel is One of the leading Telecom Service Providers in India. The scope of the engagement is to migrate the wireline network (Copper and Fiber) data from existing ArcGIS supplied by Huawei to GE Smallworld GIS and develop the service feasibility and provisioning functionalities based on the requirements.

As a Developer:

1. Data migration from Oracle to Smallworld PNI.
2. Data model changes for existing collections and ace visibilities
3. Fixing defects
4. Customizing applications and generating reports
5. Responsible for database compression.
6. Customizing the existing system for building network
7. Developing GSS magik services for different web services requirements.

As a Tester:

1. Testing OOB and Custom applications

AG&P CGS GIS Implementation - India

AG&P is a Singapore headquartered company and is the largest Foreign Direct Investment (FDI) for a greenfield city gas project. The company plays an increasingly significant role in ushering the nation's transition to a gas economy by supplying natural gas to 33 districts across five states— Rajasthan, Kerala, Tamil Nadu, Andhra Pradesh, and Karnataka.

This project involves implementing GIS Smallworld desktop, web, mobile, and GSA to cater to its business needs.

As a Developer:

1. Creating new database and application setup
2. Created a custom datamodel.
3. Developed Custom Desktop Application
4. Configuring Custom sessions
5. Involved in Data migration using FME
6. Involved in customizing the OOB applications
7. Developed magik services for web applications.
8. Testing OOB and custom applications
9. Fixing the issues in testing
10. Involved in Data migration activity using QCM tool.

Think Gas CR - India

Think Gas headquartered in Delhi NCR and operating in the districts of Ludhiana, Jalandhar, Barnala, Moga, Kapurthala, SBS Nagar in Punjab; Baghpat in Uttar Pradesh; Bhopal, Rajgarh, and Shivpuri in Madhya Pradesh; and Begusarai in Bihar.

This project involves implementing custom web applications and requires an user interface for data migration using QCM tool

As a Developer:

1. Involved in requirement gathering.
2. Low Level Design document preparation.
3. Meetings with Customers and other business teams.
4. Creating UI for QCM-GIS Integration
5. Aligning MDPE network along Steel Network and ensuring network connectivity.
6. Plotting of Imported data
7. Testing the functionalities and fixing the issue
8. Developed magik services for web applications like buffer analysis, DPR tool, Charged Network and Dashboard.

MGL GIS Upgrade - India

Mahanagar Gas Limited (MGL), one of India's leading Natural Gas Distribution Companies was incorporated on 8th May 1995. MGL is an enterprise of GAIL

(India) Limited (Maharatna Company of Govt. of India). MGL connects 10 lakh households and over 3673 small commercial and industrial establishments. MGL also supplies CNG to more than 6.5 lakh vehicles which include 2.9 lakhs and over 60,00 taxis 2.8 lakhs in Mumbai, Thane, Mira-Bhayander, Navi Mumbai and beyond.

This project involves the upgradation for the existing MGL Smallworld GDO version 4.3 to 5.2.7 and Network Viewer Plus applications.

As a Developer:

1. Database upgrade from 4.30 to 5.2.7 and resolving issues during upgrade
2. Creating custom implementers for GDO upgrade.
3. Custom applications upgrade from 4.30 to 5.2.7
4. Testing and fixing the issues in upgrade database and custom applications
5. Created custom datamodel as per requirements
6. Support for the 5.2.7 version

THINK Gas 2020 QCM- GIS integration - India

Think Gas headquartered in Delhi NCR and operating in the districts of Ludhiana, Jalandhar, Barnala, Moga, Kapurthala, SBS Nagar in Punjab; Baghpat in Uttar Pradesh; Bhopal, Rajgarh, and Shivpuri in Madhya Pradesh; and Begusarai in Bihar.

They are laying down gas infrastructure to accelerate the availability of natural gas for consumers so that everyone can contribute to creating a cleaner future. This project involves data migration from GEOJSON to GDO application.

As a Developer:

1. Reading data from geojson files and migrating the data into Smallworld.
2. Snapping of objects and ensuring the network connectivity and handling various snapping scenarios during migration.
3. Involved testing and fixing the defects.
