

CURRICULUM VITAE

TANUSRIGHOSH

Flat – 201, #30, Sri Venkateshwara Nilaya,
4th cross, Ramamurthynagar,
Bangalore 560016
Mobile no: - +918294253402
Email id: tanusrighosh88@gmail.com

CAREER OBJECTIVE

I want to be a successful GIS Architect so that fulfilling the needs and dream of the organization. As well as positioning myself in a competitive professional environment through a process of continuous learning.

PROFESSIONAL EXPERIENCE

- Having 4.6 years of Total Experience in GIS environment related to Map Making process, Parcel mapping, Spatial Analysis, Network Analysis, Project Management, Application Support, GIS Data Management in 3D and 2D Data, Geo Referencing, Geo Processing, Raster and Vector Data handling, and Navigation process, Finding the Shortest route., New Service Area., New Closest Facility, New Location Allocation, Road Networking.
- Hands on experience in ESRI Product suites (Arc Map, Arc GIS Desktop, Arc GIS Pro, Arc GIS online), Mapmaking, Routing and Navigation process.
- Job role as a **GIS Analyst at Wipro Limited from Feb 2018 to Feb 2022** for Mapmaking, Road Network Analysis, Navigation process, Spatial Analysis, Digitization, Google Maps and Parcel Mapping.
- Job role as a **GIS Developer/trainee at Eighttech Projects from Aug 2023 to Jan 2024** learning GIS web development using arcgis javascript api, javascript, html and css.

TECHNICAL SKILL

Operating System	:	Windows
Language	:	Arc GIS javascript API, Javascript, HTML and CSS.
Software	:	ESRI Products like: Arc GIS Desktop, Arc Map, Arc GIS Pro, Arc GIS Online, Q GIS, Arc Catalog, Arc Toolbox, Google Earth, GoogleEarth Pro, Natural Earth, Leica Geo-office, Network Analysis, TomTom, Client tool for various Navigation Process.
Hardware	:	RTK DGPS, Leica Geosystem(GPS), Stereoscope.

PROJECTS

Wipro Limited- Bangalore
GIS Analyst

Feb 2018 - Feb 2022

Title: - Bedrock and BFP

Role & Responsibilities -

My role is to provide the outline of a building drawn along the exterior walls, with a description of the exact size, shape, and location of its foundation as well as provides different types of road as per their usage. Assigning traffic rules and describing different traffic sign along with road sign as per policy, classified the building and roads are belonging to private property or not. Also some cloud points are classified wrongly. So my responsibility is to analyze those points and fix the error. (work example: ground point data are covered the building rooftop so need to check all the area in image which is provided my client and fix those errors manually).

Title: - Road Mapping

Client - Uber

Role & Responsibilities –

Analyzed and Reviewed road maps for different countries like: Road Names, Road Class, Road Network, Directionality, Tolls.

Title: - Cartopia Tomtom**Client - TomTom****Role & Responsibilities –**

Client were given Dsat ID that means in Map there was error in that particular area I had to do identify, analyze, and solve that issue. Editing Maps, Provides and updating information, Creating road network, navigational maps.

Title: - RD (Routing Diagnostic)**Client - Uber****Role & Responsibilities -**

Network Analysis, Network discovery, mapping, real-time monitoring and routing diagnostics, Finding Shortest and Longest Route, Digitizing the road network geometry as per criteria.

Title:- Operation & Maintenance**Role & Responsibilities -**

- Data updation on geodatabase in ArcMap.
- Basemap creation in ArcMap.
- Preparation of map layout with existing layers as per stakeholders requirements in ArcMap.

Title: - Creating India District wise GRID MAP (6*6km) for Bhabha Atomic Research Centre, Mumbai.

- Creating grid map 6*6 km displaying all taluk and district boundaries.
- Preparing District Boundary.
- Making Sub District Boundary under district boundary.
- Collecting all the villages points and creating shapefile of village points.
- Making geodatabase and integrate all the layers.
- Map layout creation using all the collected boundary.
- Software Used: - Arc GIS Desktop, Google Earth Pro

Title: - Parcel Mapping using Arc Map.**Role & Responsibilities -**

- Utilized ArcMap and related tools to create accurate parcel maps for use in urban planning and development.
- All duplicate polygons need to be dissolved using geoprocessing tools.
- Acquired parcel data from local government sources, cleaned and processed the data for mapping, and created detailed parcel maps for analysis and decision-making.
- Results: Produced high-quality parcel maps that were used by urban planners and developers for land use planning and zoning decisions.
- Software Used: - Arc GIS Desktop.
- Skills Demonstrated: GIS analysis, data management, cartography, project management.

Title: - High Resolution DEM and Contour Generation for Water Resource Planning

Objectives: - To generate terrain parameters such as detail elevations and drainage network using high resolution DEM By RTK DGPS(Field data to spatial distribution).

- Create spatial distribution map using interpolation Technique.
- To calculate runoff coefficient for each LU/LC.
 - To select suitable site for water harvesting structure (percolation tank) in BIT Mesra Campus.
- To convert data into its desired form.
- Hardware used: - RTK DGPS Set.
- Software Used: - Arc GIS, Arc Swat, Leica Geo-Office, Google Earth, MS EXCEL.

EightTech Projects- Ahmedabad

Aug 2023 - JAN 2024

GIS Developer: Client WELSPUN**Title- GIS Tools and application Development**

- The Interactive Query Tool project aimed to enhance the user experience of a web-based GIS application by implementing a robust query tool using the ArcGIS JavaScript API, Arcgis Online. The tool allowed users to dynamically query and analyze spatial data within the application, providing valuable insights for decision-making.
- As the GIS Developer for this project, my responsibilities included designing and implementing the Interactive Query Tool's functionality.

CERTIFICATION

Professional GIS Intermediate Certification from Sysglob Software Solutions Pvt Ltd, Bangalore.
Exploring Spatial Information using Arc GIS Pro Certification from Udemy.
Python with Arcpy Certification from Beasant Technologies, Bangalore.
Arcgis Javascript Api for GIS Web Development Certification course from Ezealtech, Bangalore

EDUCATIONAL QUALIFICATION

- Bachelor of Arts (geography honors) in the year 2015 with 70 percent.
- Masters of Science in Geoinformatics (Remote Sensing) in the year 2017 with 76.20 percent.
