

SUMMARY

Motivated and analytical B.E. ECE graduate aspiring to launch a career as a Data Analyst. Possessing a solid foundation in quantitative analysis, statistical methods, and data manipulation gained through coursework and projects. Proficient in programming languages such as Python and SQL, with hands-on experience in data visualization tools like Tableau and Power BI.

KEY SKILLS

- **Programming Languages:** Python, SQL
- **Database:** MySQL
- **Python :** Data Structures, Numpy ,Pandas, EDA, Matplotlib, seaborn, scaling and normalization , Model Building, Linear Regression, Logistic Regression
- **SQL :** SQL Commands, Joins, Functions in SQL, Sorting, Views, Subqueries, Entity – Relationship models.
- **MS-Excel :** Data Preprocessing, Excel Functions(VLOOKUP, HLOOKUP),Basic Statistics ,Correlation matrix, Data Visualization , Descriptive Statistics, Regression.
- **Tableau :** Data loading , Joining , Blending ,Trend analysis ,KPI analysis , Level of detail (LOD) calculation , Dual axis chart , Storytelling , Dashboard creation, Story-board creation.
- **Soft Skills:**
 - Excellent verbal and written communication.
 - Strong presentation and Storytelling.
 - Analytical and Problem Solving.

ACADEMIC PROJECTS

- **Analysis of Fitness Data**

Description: Conducted a thorough analysis of 7 years of running data from the Runkeeper app using Python, uncovering valuable insights into running metrics and progress towards set goals. Leveraged Python's data analysis capabilities to preprocess, visualize, and statistically examine the data, providing actionable recommendations for enhancing training strategies and performance.

Key Skills: Data Analysis, Data Preprocessing, Data Visualization, Statistical Analysis, Python Programming

- **E-Commerce Analysis**

Description: Seller Performance Analysis provides actionable insights on pricing, ratings, and sales volume, guiding partnership and competition strategies. Sentiment Analysis uncovers diverse emotional tones, prompting language refinement. Correlation Matrix Visualization guides strategic decisions with robust positive correlations, while weaker correlations suggest areas for exploration. Product Category Distribution Visualization highlights high-demand segments and offers opportunities for targeted initiatives

Key Skills: Data manipulation, VADER library, sentiment analysis, Handling Lookup Error, Type Error, Value Error, Proactive issue resolution, troubleshooting

Name: Yuvaraj Pandian
Phone: 6381131976
Email ID: yuvaraj30pandian@gmail.com

- **Car Claim Insurance**

Description: Leverage visual analytics on car insurance claims data to unveil actionable insights. Examine regional claim frequencies to pinpoint high-risk areas and optimize resource allocation. Analyze claim amounts across vehicle types and ages to discern severity trends, informing risk assessment and pricing strategies. Investigate temporal patterns to anticipate peak periods and streamline claims processing efficiency.

Key Skills: Data Visualization, Statistical Analysis, Time Series Analysis, Fraud Detection, Risk Assessment.

PROFESSIONAL SUMMARY

Intern Career

Jan 2024-Feb 2024

- Employed SQL queries for data analysis on a provided dataset to extract meaningful insights and patterns.

MedTourEasy

Jan 2024-Feb 2024

- Contributed to hands-on data science projects under project mentorship at MedTourEasy, leveraging analytical skills and domain knowledge.

CERTIFICATIONS

- [Forage](#) - Accenture North America -Data Analytics and Visualization Job Simulation
- [Cisco Networking Academy](#) - Python Essentials 1
- [Forage](#) - PwC Switzerland -Power BI Job Simulation
- [HackerRank](#) - SQL Basic
- [HackerRank](#) - SQL Intermediate
